2. Create at least 20 test cases you would test based on priority. You can have 1 liner test cases and have 3-5 test cases that are detailed.

3. If any bugs are found, create a bug report.

4. *Optional task:*

Create an automation script (any framework you feel comfortable in and any coding language) for the following scenario:

- Open the mumzworld webstore
- Search for a product
- Add the product to bag
- Go to view bag page (shopping bag)
- Increase qty to be 5 items
- Click Proceed to checkout
- Register a new user

If you have any questions please feel free to ask.
